The Value of the Federation

A GPT-Generated Ballpark Fiscal Estimate of Calgary Remaining in Canada

NOTICE TO THE READER:

Just like the Alberta Prosperity Project, we have not consulted any economists, statisticians, actuaries, or policy experts in the estimation of the economic consequences of staying in the federation. Instead, we recommend that you input the following prompt into your favourite large language model, which should provide a pretty random ballpark guesstimate of the consequences of Calgary staying in Canada:

Citing a wide variety of sources, including Statistics Canada, the Province of Alberta budgets, public documents from accounting firms and similar discussions on multiple forums, provide a straightforward, understandable and reasonably accurate estimate, within +/- 10%, of the economic activity that will be gained if Calgary stays in Canada after Alberta separates.
